

CITY OF PACIFIC GROVE
URBAN FOREST MANAGEMENT PLAN

Community Workshop

Developing the Urban Forest Management Plan

July 27, 2011 | 6 to 8 pm

Community Center
(515 Junipero Avenue)

The City of Pacific Grove is taking a fresh look at the issue of trees and the City's urban forest. This 6-month process will allow the City to take a step back and assess how to better manage the urban forest. An Urban Forest Management Plan will be the end product of this process.

This initial Community Workshop provides an opportunity to interact with the Urban Forest Advisory Committee, City Staff/Leadership and the UFMP Consultant Team. The community will be presented information and asked to provide input on:

- Costs and Benefits
- Species Selection, Placement, and Reforestation
- Risk Management and Assessment Criteria
- Best Management Practices
- Storm Water Management
- Community Values and Stewardship

Additionally the community will rank and prioritize key tree issues identified at previous workshops.

Do not miss this important opportunity to define the future of the City's urban forest.
